

# ELDAH

Ethics and Legality in the  
Digital Arts and Humanities

## License your work ... ... because it is good for you!

### What?

Any of your creative and scientific output.  
Not just your research results, but your research data, too!

### Why?

National and European funding bodies require Open Access.  
Telling people how to use your work will encourage them to use it.  
Share your work openly, but gain recognition for it.

### How?

Use Creative Commons: <https://creativecommons.org/choose/>  
Answer just two questions and get a legally valid license for your work!  
Do you allow people to re-use your work?  
Do you allow commercial use of your work?

### Which?

As open and reusable as possible!

DARIAH-EU recommends

If your research data is not a work, you can label it  to tell people that there are no intellectual rights attached.
