Participatory processes in urban planning projects in China
edited by Monique Abud

Taking the example of Caoyang Village, Shanghai, the authors examines ‘the citizen’s involvement in an urban planning project in China and discuss possible avenues to sustain the process in a specific local context over the long-term’.

Externalities, transport networks and the economic growth of urban clusters
edited by Monique Abud

Article co-authored by Ni Pengfei, a member of UrbaChina research team. ‘In building the transport infrastructure, equal emphasis should be placed on linking central cities with peripheral ones and on linking peripheral cities with each other’.

Why are cities becoming alike when each city is branded as different?
edited by Jacqueline Nivard

Cities are becoming alike. As a result, there is a rise of “copy-cat” cities. There are many reasons for this, and this paper looks from the perspective of city branding: how does place branding lead to the homogenization of cities?

Commuting in “green” taxi
edited by Sebastien Goulard

Electric taxis, a solution for Beijing suburbs' commuters?
http://urbachina.hypotheses.org/6271
Funded under the European Commission’s Seventh Framework Programme, **UrbaChina** is a collaborative project managed by a consortium of 11 leading Chinese and European research institutions. **UrbaChina** analyses China’s urbanisation trends for the next 40 years and define possible future scenarios with reference to concepts of sustainability.
