Sustainable automobility: understanding the car as a natural system

edited by Monique Abud

“If we are part of nature, then so is everything we make. This book explores this notion using the example of the car, how it is made and used and especially how we relate to it, with a view to creating a more sustainable automobility.”

<http://urbachina.hypotheses.org/9387>

Stop food waste

written by Chi-Han Ai

Urbanisation can lead to economic progress and modern living convenience, but it can also cause some negative consequences, such as food waste. The European Commission therefore created a series of videos and policy actions in order to encourage people not to waste food. (Article in Chinese)

Shanghai's 3D-printed houses

edited by Sebastien Goulard

3d printed houses, the future of China's housing?

<http://urbachina.hypotheses.org/9510>

UrbaChina Newsletter

*Funded under the European Commission's Seventh Framework Programme, **UrbaChina** is a collaborative project managed by a consortium of 11 leading Chinese and European research institutions. **UrbaChina** analyses China's urbanisation trends for the next 40 years and define possible future scenarios with reference to concepts of sustainability.*
